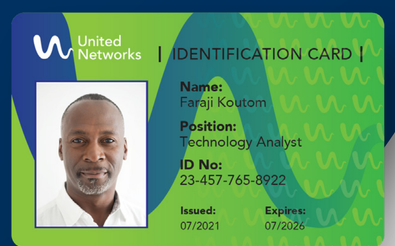
DTC1500

COST-EFFECTIVE, VERSATILE, SECURE CARD PRINTING

HID FARGO DTC1500, a flexible and modular direct-to-card printer that cuts costs and strengthens security.

Customizable watermark feature comes standard on every unit



BUILD SECURITY INTO EVERY CARD

Custom Overlay Watermark Create a customized, transparent security image — such as a logo, symbol or text — to be integrated as a permanent watermark within the printed card's overlay panel and make duplication virtually impossible.

Optional Lamination Apply overlaminates to further enhance card security and durability.

ENHANCE PRODUCTIVITY

Ribbons yield up to 700 full-color prints per roll, reducing downtime and increasing productivity.

VERSATILE CARD APPLICATIONS

Add optional contact and/or contactless card encoding to access a variety of applications:

- **Contactless door entry**
- **Cashless vending**
- **Time & attendance**
- **Gift/Loyalty cards**

RESIN THRESHOLD FOR TRUE K PANEL PRINTING

With resin threshold, operators can decide when resin should be utilized based on color concentration for darker and more crisply defined text and barcodes.

Earth-Friendly

Designed for efficient energy consumption and support for eco-friendly rewritable cards.

Improved Security

Inclusive resin scramble data protection hides any information printed with a resin panel while standard password protection and AES data encryption provide additional peace of mind.

Highly Versatile

Powerful printing in a modular, scalable design — built-in dual-side printing can be activated with the simple use of an RFID tag, making after-purchase upgrades virtually effortless.
